The unique flavour and fine quality of **LAPUELA** honey is the result of joining tradition with an exceptional environment. We have inherited from our elders a passion for beekeeping and respect for Nature, which has led us to choose the organic production system. The acidic soil of our mountains, their rich and varied flora and a favorable climate provide exceptional conditions to obtain extraordinary honey.

CALLUNA HONEY

Organic honey produced by bees from nectar mainly collected from the *Calluna vulgaris* blossom.

ORGANOLEPTIC CHARACTERISTICS

Colour: Light amber - amber with a hint of red and extraordinarily brilliant appearance.

Aroma: Floral aroma, intense and very persistent.

Taste: Sweet, with clear bitter and salt notes. Jelly-like feeling in the mouth, because of its high viscosity.

POLLEN SPECTRUM

Calluna vulgaris

Erica spp

Castanea sativa
