The unique flavour and fine quality of **LAPUELA** honey is the result of joining tradition with an exceptional environment. We have inherited from our elders a passion for beekeeping and respect for Nature. The acidic soil of our mountains, their rich and varied flora and a favourable climate provide exceptional conditions to obtain extraordinary honey.

HEATHERHONEY

Honey produced by bees from nectar mainly collected from the heather blossom.

ORGANOLEPTIC CHARACTERISTICS

Colour: Amber with a hint of red.

Aroma: Intense and persistent aroma.

Taste: Sweet, with a clear bitter component and a hint of salt.
