The unique flavour and fine quality of **LAPUELA** honey is the result of joining tradition with an exceptional environment. We have inherited from our elders a passion for beekeeping and respect for Nature. The acidic soil of our mountains, their rich and varied flora and a favourable climate provide exceptional conditions to obtain extraordinary honey.

FORESTHONEY

Honey produced by bees from nectar collected from chesnut, heather and bramble flowers.

ORGANOLEPTIC CHARACTERISTICS

Colour: Amber - dark amber.

Aroma: Floral, intense and persistent aroma, with a clear woody component.

Taste: Sweet taste with salt notes and hint of bitterness.

POLLEN SPECTRUM

Castanea sativa
Erica spp
Rubus spp

PRODUCTION AREA

High mountain forests of Asturias (North of Spain).

HARVEST SEASON: Late Summer.
